Forecast for Saturday 04 Jun 2022

Weather: A cloudy start to the morning, with cloud thick enough to produce the odd spot of drizzle on some east facing slopes. Cloud will lift and break by mid-morning to leave a fine and sunny afternoon. It is expected to remain dry throughout, however there is an outside chance of the odd rain shower glancing the south of the Peaks during the afternoon. Cloud returning once more overnight from the west.

Chance of cloud-free hill tops above 600m: 20% initially on eastern slopes, soon becoming 90%. Falling to 40% in the east late on.

Low cloud and visibility: Broken cloud around 400m possible at first, perhaps lower on east facing slopes. Cloud soon lifting clear of summits with very good visibility and clear views of distant hills expected thereafter. Cloud lowering to around 500m by midnight on eastern slopes.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Blustery conditions will make for challenging walking conditions at times, particularly on exposed higher summits. Low cloud and strong winds resulting in early temperatures feeling close to freezing on higher peaks. Strong sunlight and elevated UV levels expected through the afternoon, with sun protection advised.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sat 04 Jun 2022	0.2mm	0.2mm	0.2mm

Forecast for Sunday 05 Jun 2022

Weather: A cloudy but dry start to the day, with the best of any brightness in the west of the park. A slow-moving area of rain will push northwards from mid-morning, perhaps heavy and thundery at times. This rain may persist overnight and gradually become more showery in nature. Northern areas may remain dry.

Maximum wind: Easterly or northeasterly 15-20mph, gusting 30-35mph on higher summits.

Chance of cloud-free hill tops above 600m: 40% on eastern slopes initially. Improving to 80% before rain arrives, then 30%.

Low cloud and visibility: Broken cloud of 500m possible at first, mainly on eastern slopes. Cloud lifting and breaking above summits for a time, before persistent rain sees bases lower to 300-500m. Visibility good underneath cloud, but poor or very poor in rain and heavy rain.

Temperature: **Valleys:** Plus 8 Celsius, rising to Plus 12 Celsius.
At 600m: Plus 5 Celsius, rising to Plus 9 Celsius.
Freezing level: Above Summits.
